Manggahan, General Trias, Cavite, Philippines

EDUCATION

- ✓ **BS Computer Engineering (2015 - 2021)**
Trimex Colleges (Formerly Trimex Institute of Science and Technology) Biñan Laguna
- ✓ **BS Accountancy (2013 - 2015)**
San Pedro of Business Administration San Pedro Laguna

SKILLS

- ✓ **Computer and Printer Repair**
Skilled in diagnosing and repairing computer and printer issues, including reformatting and system restoration.
- ✓ **Google Sheets Proficiency**
Developed a comprehensive gatepass monitoring system connecting data for all delivery and receiving items, demonstrating strong data management and analytical skills.
- ✓ **Excel Automation Expertise**
Created an automated program in Excel that generates unique 5-digit numbers and calculates averages, showcasing advanced formula and VBA scripting abilities.
- ✓ **Web Development**
Currently enhancing skills in web development with HTML and CSS, with plans to advance to Java and other tools.
- ✓ **Network**
Actively studying networking principles to expand understanding and skills in network setup and management.
- ✓ **Image Editing and Design**
Experienced in Adobe Photoshop for image editing, logo creation, and producing professional handbooks.
- ✓ **PowerPoint Presentation Skills**
Skilled in creating professional PowerPoint presentations; developed impactful presentations for current company projects.
- ✓ **3D and 2D Modeling**
Proficient in AutoCAD and SolidWorks for creating detailed 3D and 2D models; successfully completed complex 3D modeling projects using SolidWorks.

EXPERIENCE

ICT Technical Officer/Sales Officer (August 2023 - January 2025)
CK Galvanizing Corporation - Block 5 Lot 6A Main Drive, FCIE Compound Bo. Langkaan, Dasmariñas Cavite

In my role within the ICT Department, I implement data security works, by conducting regular data backups using external hard drives, ensuring all critical documents are securely saved and easily retrievable. I have experience setting up Wi-Fi extenders and wireless networking devices to ensure complete coverage in production areas, thereby enhancing connectivity and operational efficiency. My responsibilities include assessing and troubleshooting a wide range of connectivity issues, as well as diagnosing and resolving system errors and equipment malfunctions, ensuring minimal disruption to office operations. To ensure an efficient and fast network experience, I regularly monitor and manage both LAN and Wi-Fi networks. Additionally, I facilitate the setup of equipment for new users and incoming employees, optimizing system performance and ensuring readiness for operational demands. In the ICT Department, I am required for the creation and implementation of efficient work procedures, enhancing overall productivity. My technical expertise extends to creating precise 3D and 2D drawings, detailing product specifications to meet customer and logistics requirements. I have developed a comprehensive Google Sheets tracking system to meticulously track all incoming and outgoing items, including gate passes and truck scale earnings. As part of my documentation process control, I properly prepare and manage delivery and goods receipts. I also issue Zinc Certificates to verify zinc thickness measurements, upholding quality standards. In collaboration with clients, I provide updates on product progress, and I work closely with managers to suggest and implement process improvements. My commitment to quality and standards is further demonstrated through my work with our DCC to implement ISO standards. I also support colleagues by assisting with form creation and addressing documentation needs.
